Subject: Rare film formats/lab equipment available in Germany
To: Multiple recipients of list FRAMEWORKS
<FRAMEWORKS@LISTSERV.AOL.COM>

For filmmakers currently on the list, I have just received three important addresses in Germany from alchemist/filmmaker Jurgen Reble:

JOBO makes 16mm developing spools for 30 meters (100 feet), but without tanks. The price: 455 DM plus 15% tax.

JOBO Labortechnik
Kolner Strasse 58
D-51645 Gummersbach
Germany
tel: (49) 2261 5450
fax: (49) 2261 54542

Regular 8mm, double 8mm, super-8 mm and double super-8 mm film stock is available at:

Kahl Media Art
Postfach 1560
D-50321 Bruhl
Germany
tel: (49) 2232 49188
fax: (49) 2232 44149

Their prices are a little less than Kodak and they use Orwo stock. They also sell Russian developing tanks for 8, 16 and 35 mm with 15m length spools. Price: 198 DM plus 15% tax.

Kahl Media Art still develops black and white 8mm. Another lab is:

Andec Filmtechnik
Hasenheide 9
D-10967 Berlin
Germany
tel (49) 30 6917036
fax (49) 30 6930321

If anyone is interested in knowing how to develop black and white or color Super-8 or 16mm movie film in your own bathtub, I will post instructions here.
